GiO MODULE

The new M-iClean U

Get ready for a new era of dishwashing

The name – MEIKO *M-iClean U* – is the same. Everything else is new. Once again, our engineers have given their all to overhauling every aspect of the design. *GiO MODULE*, yes – but now it is completely integrated. That saves space, as well as installation and maintenance costs. What about heat recovery? Yes, and now it is highly efficient.

With a larger stainless steel surface area. The name: MEIKO *ComfortAir*. Removes up to 80 %** of steam. For convenient, comfortable and super speedy dishwashing. And the hygiene? Yes. Superlative. The fresh water circulates in a completely separate system. **The result: Get ready for a new era of dishwashing. Amazing.**

Get it done faster:

- » ... with faster dishwashing cycles
- »» ... working in a comfortable, with reduced steam levels
- »»» ... with faster drying
- »»»» ... with faster installation
- »»»»» ... with lower running and maintenance costs
- »»»»»» ... cleanliness and hygiene

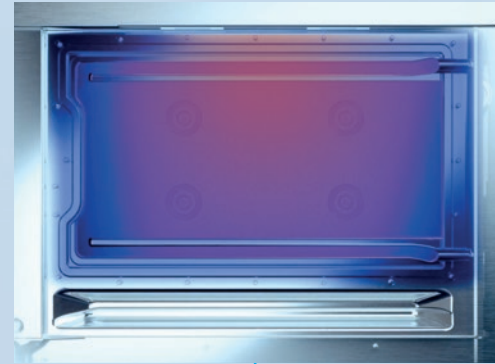

» Installed faster

The compact structure and the pre-integrated MEIKO *GIO MODULE* reduce space requirements and **eliminate the need for time-consuming pre-installation or alterations**. That saves you time, space and money.

»» Wash faster

The new *M-iClean U* is changing the game – the new design and increased size of the heat recovery tank **saves an entire 30 seconds* per wash cycle**. That's a record.

»»» Dry faster

The new heat recovery system condenses even more moist steam on the internal wall of the machine. That means that by the end of the cycle, **the residual moisture is down by up to 98%** on plates and up to 75%** on glasses**.

»»»» Save faster

This sensational new heat recovery system saves valuable resources on the new *M-iClean U*. The result: **up to 21%** lower running costs**.

»»»»» Unload faster:

When the LED indicator handle turns blue, the wash has finished. Open the door – the air is clear. **No hot steam** in your face, no fogged-up glasses, no moisture on furniture. Time for the next wash.

On track for success with the **new M-iClean U**

Discover the benefits, step by step

»»»»»»» Quality made by MEIKO is always a winner.

Stainless steel instead of plastic and **innovative technology** where nothing is outdated. The top quality of the *M-iClean U* will put you on track for success. Long-term success.

»»»»»»» Making friends faster

Easy and intuitive usability and comfortable working conditions mean your staff will be immediate fans of this dishwashing machine – and highly motivated on the job.

»»»»»»» Get the picture faster

Use **Private Label** to turn the new *M-iClean U* into a fully customised MEIKO machine just for you. Configure your welcome screen to use your logo. You can even save up to three different images as screen savers, such as contact details for our service team.

»»»»»»» Speedy filter changes

With the new *M-iClean U* you can quickly **change the fine filter yourself**. Just like that! No downtime or maintenance costs – you're always ready to go.
